Guidelines For Granting of Performance Option Variances:

The intent of the Code is to upgrade the housing stock. In order to accomplish this, the City offers performance options that allow for improvements to occur to property which otherwise would not be allowed by Code. These options, or performance standards, are in lieu of the requirements listed in the zoning districts. **Approval of a variance using the performance option is based on a point system that is awarded depending on the proposal.** The performance option may be applied to single-family structures as regulated in the R-1, R-2, R-3 Districts, or as may be referenced in other zoning districts. These options may be applied to accessory structures such as detached garages/sheds, porches and carports. They are not applicable to accessory uses such as pools/enclosures or fences.

Encroachment calculation:

Please state the specific variance encroachment request: (Example: 10-foot variance reducing the front setback along road from 25 feet to 15 feet.)

Please note, a minimum of 10-feet shall be maintained between the structure and the property line.

Example of calculating percentage of encroachment: 10-foot variance reducing the front setback along road from 25 feet to 15 feet. 10 feet (amount of variance) divided by 25 feet (required setback) equals a 40% encroachment and would require 41 points for approval of the variance.

Percentage of encroachment:	Points necessary:
0-20%	26
21-40%	41
41-50%	51
51-60%	61
61+%	71
Calculation encroachment:	Points necessary for variance:

Point calculation:

Calculation of points is based on the following listing:

Proposed Improvement	Maximum Points Allotted	Staff Only Points Awarded
Elevation or flood proofing		
Conversion from MF to SF		
Two-car garage addition/carport enclosure		
Reclaimed water connection		
Fire sprinkler system addition
